

The Battery is Dying too Quickly

If your iPad is dying too quickly during the school day.

Please follow the instructions below:

Step 1: See which app is draining your battery:

- Go to setting
- Scroll down and select “Battery”
- Once selected, allow for the diagnostic to refresh
- See at the top of the list under “Battery Usage” you can see which app has been utilizing the most battery.

See which app might be using your location in the background unnecessarily

- Tap settings on your device
- Scroll and select “Background App Refresh”
- Once selected turn off the apps that you feel don't need to know your location if they are not open

The Battery life should be good now.
